BIOGRAPHY

Meet Olivia, a 28-year-old American expat who moved to The Netherlands to pursue her dream of becoming a physics teacher. Born and raised in a small town in Pennsylvania, Sarah developed a love for science at a young age, spending countless hours reading books and conducting experiments in her backyard. After completing her undergraduate degree in physics at a university in the United States, she knew that she wanted to teach and inspire others to appreciate the wonders of the universe.

THE PROBLEM

Olivia has many friends still in the United States and tries to scale her network and friendgroup. This is a real struggle for her since she doesn't speak the Dutch language.

FRUSTRATIONS

While Olivia has been successful in her pursuit of becoming a physics teacher in The Netherlands, she has faced her fair share of challenges along the way. One of her biggest frustrations has been learning the Dutch language. Despite her best efforts, she has found it difficult to pick up the language quickly, and often struggles to communicate with her colleagues and students.

As a dedicated teacher, Olivia understands the importance of being able to speak the language of her students and connect with them on a personal level. She has enrolled in Dutch language courses and spends hours each week practicing and studying. However, she still feels frustrated that she can't express herself as clearly and confidently as she would like.

Sarah's frustration with learning the Dutch language is not uncommon among expats who move to the Netherlands. The Dutch language can be notoriously difficult to learn, with its complex grammar rules and unusual pronunciation. However, Olivia is determined to overcome this obstacle and is committed to becoming fluent in Dutch so that she can fully embrace the culture and connect with her students on a deeper level. Despite the challenges, Sarah remains optimistic and motivated, knowing that the rewards of learning a new language will be well worth the effort.

GOALS

Olivia's ultimate goal is to inspire her students to pursue their passions and reach their full potential. She believes that physics is not only a fascinating subject but also a gateway to a wide range of careers and opportunities. She hopes to create an engaging and interactive learning environment where her students can explore the wonders of the universe and discover their own unique talents and interests. With her dedication and enthusiasm, Sarah is poised to make a positive impact on the lives of her students and the field of education as a whole.
